

KELETSO BELAFONTE RAMOTHIBE

BSc Information Technology Graduate | Software Developer | AI & Cloud Enthusiast

keletsoramothibe99@gmail.com | 063 464 8207 | Germiston, Gauteng

PROFESSIONAL SUMMARY

BSc Information Technology graduate with hands-on experience in software development, cloud technologies, data analytics, and AI-powered application development. Skilled in C#, Python, Java, JavaScript, SQL, Firebase, Next.js, and modern development tools, with experience building and deploying full-stack and AI-driven solutions. Completed the CAPACITI AI Skills Acceleration Programme, gaining practical exposure to AI tools, prompt engineering, responsible AI, workplace productivity, and Microsoft Azure Fundamentals. Eager to contribute as a Graduate Software Developer, IT Graduate, Junior Developer, or AI/Cloud-focused professional.

TECHNICAL SKILLS

- **Programming:** Python • C# • Java • C/C++ • JavaScript • SQL
- **Web & Software Development:** HTML5 • CSS3 • React • Next.js • Flask • Dash • Windows Forms • ASP.NET
- **AI & Data:** Generative AI • Prompt Engineering • Responsible AI • Machine Learning Fundamentals • Pandas • NumPy • Plotly • MATLAB
- **Databases:** SQL Server • MySQL • MongoDB • Firestore • MS Access
- **Cloud & Dev Tools:** Microsoft Azure AI Fundamentals • Firebase • Vercel • Render • Netlify • Git • GitHub • VS Code • Visual Studio
- **Microsoft & Productivity:** Microsoft 365 • Word • Excel • PowerPoint • Outlook
- **Soft Skills:** Problem Solving • Communication • Team Collaboration • Adaptability • Continuous Learning

SELECTED PROJECTS

CareerPilot AI — 2026

- Developed an AI-powered career and productivity assistant for graduates and job seekers.
- Designed an integrated dashboard for AI email generation, company research, task planning, career coaching, and application tracking.
- Applied structured prompt engineering and responsible AI practices, including human oversight and AI-generated content disclaimers.
- *Technologies:* React, TypeScript, Tailwind CSS, shaden/ui, Framer Motion, Lovable AI, Git, GitHub.
- *Live Demo:* careerace-ai-mate-kl99-chi.lovable.app

Awesome Athletics Club (AAC) Management System — 2025

- Led development of a desktop application for managing athletics club members, events, merchandise, bookings, and reporting.
- Implemented layered architecture, database interactions, reporting, validation, and core application functionality.
- *Technologies:* C#, ASP.NET, Windows Forms, SQL Server/MS Access, Visual Studio, Git.
- *Repository:* github.com/kl99-chi/awesome-athletics-club-system

NWU Exchange App — 2025

- Extended a university marketplace prototype into a full-stack application for students to buy, sell, and trade items.
- Implemented Firebase Authentication, Firestore security rules, Next.js API routes, and secure ImageKit image uploads.
- *Technologies:* Next.js, Firebase, Firestore, Vercel, ImageKit, Git.
- *Live Demo:* nwu-exchange-app-99.vercel.app

ClearVue Sales Reporting System — 2025

- Developed a real-time business intelligence dashboard for sales, customer, supplier, and inventory analytics.
- Integrated MongoDB, Apache Kafka, Pandas, Plotly Dash, and Flask; independently deployed the application to Render.
- *Technologies:* Python, Dash, Flask, Pandas, Plotly, MongoDB, Apache Kafka, Render, Git.
- *Live Demo:* clearvue-reporting-system.onrender.com

PROFESSIONAL DEVELOPMENT

CAPACITI AI Skills Acceleration Programme: 3 – 7 Aug 2026

- Completed training in AI fundamentals, AI productivity tools, prompt engineering, responsible AI, and emerging AI technologies.
- Earned the Google AI Essentials Professional Certificate.
- Completed Microsoft Azure Fundamentals learning modules and mock examination.
- Developed CareerPilot AI, an AI-powered career and productivity assistant demonstrating practical AI implementation, prompt engineering, and responsible AI principles.

Entecl Hack<IT> 2026 Hackathon: 12 Sept 2026

- Solo entry in Entecl's Hack<IT> hackathon; built a deterministic Python simulation engine for a tick-based plant-ecosystem growth challenge across four escalating difficulty tiers.
- Modelled grid-based competitive plant spreading (nutrient decay, shade, terrain and soil constraints), animal-triggered species-unlock condition trees, and a diversity/longevity scoring function.
- Designed a heuristic planner with local-search optimisation to schedule planting actions and maximise ecosystem diversity within strict per-tick action limits; awarded a Certificate of Participation.

EDUCATION

Bachelor of Science in Information Technology — North-West University | 2023–2025 | Overall Average: 66.82%

National Senior Certificate — Lethukuthula Secondary School | 2018–2022 | Overall Average: 65%

CERTIFICATIONS & SHORT COURSES

- Entecl Hack<IT> 2026 — Certificate of Participation, 12 September 2026
- Microsoft Azure AI Fundamentals — Microsoft, 26 August 2026
- Google AI Essentials Professional Certificate — Coursera, 5 August 2026
- Java (Basic) Certification — HackerRank, 20 June 2026
- MATLAB Onramp — MathWorks, 5 March 2026
- Machine Learning Onramp — MathWorks, 23 January 2026
